WELCOME & HOW TO USE THIS LIBRARY

03

I built this prompt library after watching hundreds of talented coaches and consultants burn out from administrative tasks that AI could handle in seconds. You didn't become a coach to spend three hours crafting intake forms or two days writing proposals. You became one to transform lives and businesses.

I've tested every prompt in this collection across ChatGPT, Claude, Gemini, and Mistral. Each one produces useful first drafts that cut your admin time by 70-90%. The prompts follow a simple pattern: they set context, define your role, specify the output format, and include smart constraints that prevent generic fluff.

When you see text in [ALL_CAPS_BRACKETS], replace it with your specific details. For example, [CLIENT_INDUSTRY] becomes "healthcare startups" or [SESSION_DURATION] becomes "90 minutes". The rest of each prompt stays exactly as written - that's the tested formula that works.

These prompts aren't magic. They're tools that free up your mental bandwidth for the high-value work only you can do: asking the right questions, spotting patterns your clients miss, and guiding breakthrough conversations. Use them to handle the routine stuff faster, then spend your saved time where it actually moves the needle.

>

Be specific in your variable replacements. "Marketing consultant" gets generic output. "B2B SaaS marketing consultant specializing in product launch strategies for Series A startups" gets gold. The more context you provide, the more useful your results.
